Index of Subjects

Ayrshire cattle, concentrate level fed + Na acetate, daily diet, 5

Biochemical methods, *vs.* chromatographic, identification of Group D streptococci, Cheddar cheese, 57
Blood, estimation in milk, 131
Butter, cold-stored, surface oxidation, 151
hesion and consistency, 15
Butterfat, oxidation, Cheddar cheese, 139

Carbon dioxide, requirement, *Str. lactis*, ML_3, 175
Casein, breakdown, rennin and rennet, viscometric studies, 165
Cheddar cheese, butterfat oxidation, 151
flavour, *Micrococcus* sp. in milk, 245
bacteriology (review of the progress of dairy science), 303
Str. cremoris and *Str. lactis* starters, 221
Group D streptococci, identification, biochemical *vs.* chromatographic methods, 57
New Zealand, flavour, volatile fatty acids, 1
tallowy defects, haematin compounds, 33
trace metals, 21
Chromatography, *vs.* biochemical methods, identification, group D streptococci, Cheddar cheese, 57
Clover, red, (*Trifolium pratense*), oestrogenic activity, 265
Cold storage, butter, surface oxidation, 151
Concentrates, level fed + Na acetate, Ayrshire cattle, 5
pre-and *post partum*, milk yield, 231
Consistency, butter, 15

Dairy cattle, genetics (review of the progress of dairy science), 195
urea utilization, 157
Dairy Science, bacteriology, Cheddar cheese flavour (review), 303
genetics (review), 195
milk-borne diseases (review), 87
Defects, Cheddar cheese, haematin compounds, 33
trace metals, 21
Diseases, milk-borne (review of the progress of dairy science), 87
udder, milk yield and composition, 75
Dried milk, gas-packaging, N_2+H_2+Pa catalyst, 285
particle size, dispersibility in organic liquids, 277
Dye-binding methods, milk protein determination, 43

Feeding, concentrates, level fed + Na acetate, Ayrshire cattle, 5
pre- and *post partum*, 231

Genetics, dairy cattle (review of the progress of dairy science), 195
Gravimetric methods *vs.* hygrometric methods, S.N.F. determination in milk, 109

Haematin compounds, tallowy defect, Cheddar cheese, 33
Hesion, butter, 15
Hydrogen peroxide, effect on the nutritive value of milk, 177
Hygrometric methods, *vs.* gravimetric methods, S.N.F., determination in milk, 109

Micrococci, penicillinase producing, milk contaminated with penicillin, 183
sp. in milk, Cheddar cheese flavour, 245
Milk, estimation of blood content, 131
nutritive value, effect of H_2O_2, 177
pyridoxamine phosphate, 293
Milk-borne diseases, review of the progress of dairy science, 87
Milk composition, disease, udders, 75
Milk deposits, heat exchange surfaces, 255
Milk fat, physical properties, crystallization factors, 117
chemical modification, 81
Milk protein, determination, dye-binding methods, 43
Milk yields, disease, udders, 75
effect of milking interval, 209
level of concentrates fed, *pre-* and *post partum*, 231
Milking, effect on residual milk, 123
interval, milk yield, 209

Nutritive value, milk, effect of H_2O_2, 177

Oestrogens, activity, red clover (*Trifolium pratense*), 265
Oxidation, fat, Cheddar cheese, 139
surface, cold-stored butter, 151

Packaging, gas, dried milk, N_2+H_2+Pa catalyst, 285
Penicillin, contamination milk, penicillinase in cheese starters, 183
Penicillinase, cheese and yogurt starters, milk contaminated with penicillin, 183
Pyridoxamine phosphate, in milk, 293

Residual milk, various factors affecting, 123
increase, effect on milk yield, 209
Rennet, casein breakdown, viscometric studies, 165
Rennin, casein breakdown, viscometric studies, 165

Solids-not-fat, determination in milk, hygrometric *vs.* gravimetric methods, 109

Sodium, acetate, level concentrates fed, Ayrshire cattle, 5
Starters, cheese and yogurt, penicillinase producing strains, penicillin contamination, milk, 183
Str. cremoris, *Str. lactis*, Cheddar cheese flavour, 221
Streptococci, Group D, identification Cheddar cheese biochemical *vs.* chromatographic methods, 57
Streptococcus, *cremoris*, Cheddar cheese flavour, 221
lactis, Cheddar cheese flavour, 221
Strain ML_3, CO_2 requirement, 175

Trace metals, Cheddar cheese, tallowy defects, 21

Udder, disease, milk yield and composition, 75
Urea, utilization, dairy cows, 157

Vitamins, pyridoxamine phosphate, milk, 293
Volatile fatty acids, flavour, New Zealand Cheddar cheese, 1
